**Class Specification – Application Support Administrator I**

<b>Summary Statement:</b>	
<p>The purpose of this position, under direct supervision, is to implement and support “commercial off the shelf” (COTS) software solutions of a basic degree and complexity and scope used to meet customer needs spanning from one to multiple City departments that are in line with City strategy, industry best practices and trends, and City standards, policies, and procedures. The administrator may also be involved in researching, and evaluating possible solutions to modernize the City’s application portfolio. Follows all City IT processes, procedures, and policies related to incident management, request management, knowledge management, and change management.</p>	
<b>Essential Functions</b>	Note: Regular and predictable attendance is an essential function in the performance of this job.
<b>Time %</b> (All below must add to 100%)	Note: Time spent on each essential function will vary based on operational needs and is only intended to be an approximation over the course of a full year.
90%	Supports COTS software solutions including installation, configuration, testing, monitoring, and troubleshooting. Provides application security, user setup, role privilege definitions and assignments, and security permissions; serves as the primary liaison with the vendors on product deployments, upgrades, data migrations, support issues, or product issues. Coordinates the IT responses to the customers and vendors across IT teams. Oversees the installation and/or upgrade of software patches and releases. Creates system documentation and user training materials; and trains users in the proper use of hardware or software. Reports on the use and effectiveness of the solutions. Provides user support and coordinates scheduled downtime and upgrades with user community. Reads technical manuals, confers with users, or conducts computer diagnostics to investigate and resolve problems or to provide technical assistance and support.
10%	Deploy new COTS software; ensure configured solution meets business requirements and use cases and is sustainable; migrate from existing application to replacement application; and plan and execute integration and acceptance testing. May research potential COTS software solutions to determine fit with business needs.
