

North Nevada Avenue Plan
Community Workshop #1
August 3, 2016

Small Group Instructions

Task #1: Please introduce yourselves at your table, then take a few minutes to individually review the blue handout that has the preliminary list of project challenges, opportunities, and elements of a vision for the project area.

Task #2: Discuss and decide as a group which two challenges your group believes are most important to address. Please ask someone in your group to list them on your yellow Group Response Form. This task should take about 15 minutes.

Task #3: Then discuss as a group which two opportunities your group believes are most important and add those to your Group Response Form. This task should take about 15 minutes.

Task #4: Finally, have a group discussion about how you would like this area of North Nevada Avenue to look and feel in the next 10 years. Then take a look at the preliminary list of vision elements and put on your Group Response Form any that your group believes are missing and should be added. This should also take about 10 minutes.

Task #5: Once you have your Group Response Form completed, please choose someone from your group to report your group's additions to the full group. Report-out will occur once all groups have finished their work. While you're waiting, group members should complete their green Individual Response Forms.
