**Class Specification – Fire Protection Engineer II**

**Summary Statement:**

The purpose of this position is to perform a variety of engineering functions for the fire department to ensure improved fire and life safety for the community through specialized education and training. This is accomplished by code compliance and analytical plan review of complex fire protection feature; code consulting and interpretation; risk analyzing; and supporting and engineering assistance. Other duties include assisting fire investigations; developing, implementing, and delivering training classes and materials for internal and external customers; and conducts fire modeling.

**DISTINGUISHING CHARACTERISTICS:**

This is the full journey level class within the Fire Protection Engineer series. Employees within this class are distinguished from the (I level) by the performance of the full range of duties as assigned. Employees at this level receive only occasional instruction or assistance as new or unusual situations arise, and are fully aware of the operating procedures and policies of the work unit. Positions in this class are flexibly staffed and are normally filled by advancement from level I, or when filled from the outside, have prior experience.

<b>Essential Functions</b>	Note: Regular and predictable attendance is an essential function in the performance of this job.
<b>Time %</b> (All below must add to 100%)	Note: Time spent on each essential function will vary based on operational needs and is only intended to be an approximation over the course of a full year.
40%	Performs code compliance and analytical plan review by facilitating and attending meetings; generates plan review comments and reports; performs detailed analysis of potential fire hazards and coordination of various fire protection systems; coordinates fire and life safety aspects of design disciplines; and analyzes hydraulic, battery and other plan specific calculations. Performs risk analysis and communicates results with internal and external stakeholders.
25%	Performs various program administration duties by establishing and generating program rules and regulations. Uses various computer programs to create word documents and PDFs in order to publish information online. Performs, develops,

<b>Job Title</b>	<b>Fire Protection Engineer II</b>	<b>FLSA Status</b>	<b>Exempt</b>

<b>Zone</b>	<b>7</b>	<b>Job Code</b>	<b>17092</b>

	implements, and delivers code and fire protection system training for presentations, training materials, handouts, and videos for broadcast.
10%	Performs code consulting and interpretations by facilitating and attending meetings; placing and returning calls; and documenting interpretations. Provides support assistance in emergency situations by providing code consultation for emergency responders. Writes inspection reports, communicates with emergency responders, and provides on-call, after-hours response.
10%	Performs code compliance inspections by communicating with internal and external customers; generates inspection and other reports; takes notes; takes photographs of code violations; and checks computer usages. Performs technical research on various codes and standards; reads technical journals; performs internet searches; writes reports; and makes recommendations.
5%	Attends meetings and serves on a variety of committees and boards, including technical planning and review groups.
5%	Evaluates performance-based design and alternative methods and materials by reading and reviewing corresponding documents; reviewing required codes and standards; and understanding fire dynamics. Assists fire investigations by generating floor plans of buildings on AutoCAD; researches building history; provides fire dynamics insight; builds and runs computer fire models; and provides cause fault investigation on system activation or failure.
5%	Conducts computer modeling for fire and life safety by understanding inputs and outputs of computer modeling software for fire growth, egress, and traffic movement.

**Competencies Required:**

Human Collaboration Skills: Interactions have significant impact and may involve recommendations regarding potential policy development and implementation. Position evaluates customer satisfaction, develops cooperative associations, and utilizes resources to continuously improve customer satisfaction.

**Reading:** Advanced - Ability to read literature, books, reviews, scientific or technical journals, abstracts, financial reports, and/or legal documents. Ordinarily, such education is obtained at the college level or above. However, it may be obtained from experience and self-study.

**Math:** Advanced - Ability to apply fundamental concepts of theories, work with advanced mathematical operations methods, and functions of real and complex variables. Ordinarily, such education is obtained at the college level or above. However, it may be obtained from experience and self-study.

**Writing:** Advanced - Ability to write editorials, journals, speeches, manuals, or critiques. Ordinarily, such education is obtained at the college level or above. However, it may be obtained from experience and self-study.

**Technical Skills Required:**

Skilled in a Technical Field: Work requires a comprehensive, practical knowledge of a technical field with use of analytical judgment and decision-making abilities appropriate to the work environment of the organization.

**Relevant Background and Formal Education:** Demonstrated skills, competencies, and knowledge required for this job are most often acquired through the following practical experience and level of academic education and training as suggested below.

**Education:** Bachelor's degree from an accredited college or university with major coursework in Fire Protection Engineering or related field.

**Experience:** Three years of full-time fire protection engineering experience and modeling programs and experience in preparing and reviewing plans and specification for construction and fire protection systems.

**Education and Experience Equivalency:**

This classification is not eligible for education or experience equivalency.

**Certifications and Licenses:** Must possess or be able to acquire the following certifications and/or licenses.

<b>Job Title</b>	<b>Fire Protection Engineer II</b>	<b>FLSA Status</b>	<b>Exempt</b>
<b>Band</b>	<b>PRO</b>	<b>Probationary Period</b>	<b>12 Months</b>
<b>Zone</b>	<b>7</b>	<b>Job Code</b>	<b>17092</b>

Professional Engineer (PE)	Upon Hire
International Code Council (ICC) Fire Inspector II	Within 12 months of hire
International Code Council (ICC) Fire Plans Examiner	Within 12 months of hire
Hazardous Materials Awareness	Within 12 months of hire
State of Colorado Inspector III/Plans Examiner	Within 12 months of hire
State of Colorado Fire Suppression System Inspector	Within 12 months of hire
ICS 100	Within 12 months of hire
ICS 400	Within 12 months of hire
ICS 700	Within 12 months of hire
Certifications required in accordance with standards established by departmental policy.	

<b>Supervision Exercised:</b>
Work requires the occasional direction of helpers, assistants, seasonal employees, interns or temporary employees.
<b>Supervision Received:</b>
Receives General Direction: The employee normally performs the job by following established standard operating procedures and/or policies. There is a choice of the appropriate procedure or policy to apply to duties. Performance review periodically.

<b>Fiscal Responsibility:</b>
This job title has no budgetary responsibility.

<b>Physical Demands:</b>
Exerting 20-50 lbs. occasionally; 10-25 lbs. frequently; or up to 10 lbs. constantly.

<b>Environmental Conditions</b>	<b>Frequency</b>
Primary Work Environment	Office Environment
Extreme Temperature	Seasonally
Wetness and Humidity	Seasonally
Respiratory Hazards	Several Times per Month
Noise and Vibrations	Several Times per Month
Physical Hazards	Several Times per Month
