

Erosion Control Seminar
Presented by Tom Gore from
Altitude Training Associates

When: Monday, October 24, 2016
 (8:00-5:00 pm) 7:30 am check-in

Where: **City Administration Building**
30 S. Nevada Ave. Suite 102
Colorado Springs, CO

Cost: \$75.00 includes handouts, and a certificate of completion which certifies you with the City (following successful passage of final exam).

Parking is available in the parking garage for a fee. Free street parking is available a few blocks away. Parking will NOT be validated.

Lunch will NOT be provided.

No cancellations 14 days prior to class. Substitutions allowed until class time.

Name(s):		
Company:		
Email:		
Address:		
City:	State	Zip:
Phone		
Fax		

Registration deadline: **Friday, October 14th.**
 Please enclose a check for \$75.00 per person for the Erosion Control Class made payable to City Engineering**
Sorry, Credit Cards are not accepted.

Return registration form to:
City Engineering
Attn: Crystal Luna
P.O. Box 1575 MC 410
Colorado Springs, CO 80901
 For more information, call **719-385-5427**

***EMAIL YOUR RESERVATION TO:**
CLUNA@SPRINGSGOV.COM

***Seating is limited to 50. A wait list will be formed if needed. Registration space is not guaranteed until fee has been received.**

State Requirements

Construction activities that disturb one or more acres, or which are part of a larger common plan of development or sale that will disturb 1 acre; are required to obtain a "Discharge of Stormwater Associated with Construction Activities" permit through the Colorado Department of Public Health and Environment.

For more information, contact the Colorado Department of Public Health and Environment, Water Quality Control Division at (303) 692-3500.

STORMWATER MANAGEMENT AND EROSION CONTROL DURING CONSTRUCTION

Training Class!!

Monday

October 24, 2016

8:00am to 5:00pm

What will the class offer?

This class will provide in depth instructions on the installation requirements for BMPs as well as up to date information on the current regulatory requirements, products and materials for the control of erosion and sedimentation at construction sites. The course presents the legal requirements under the Colorado Stormwater Program with a focus on Best Management Practices (BMPs). Examples of the City of Colorado Springs municipal program activities and requirements will be reviewed. The program will also cover permit conditions for water quality. BMPs used for erosion control are discussed as well as sediment control, equipment, materials and waste management showing examples from construction sites. The course also covers how to determine maintenance requirements and what techniques or products may be useful. Overall, the course is based on a series of examples and case studies.

Student Learning Objectives- Upon completion of this class, students will be able to:

- ◆ List the permit requirements under the stormwater program
- ◆ Describe the impacts to water quality caused by erosion and sedimentation
- ◆ Describe the installation and maintenance requirements for BMPs used during construction
- ◆ Describe the function of various administrative and structural site controls
- ◆ Describe the BMP evaluation process to determine if maintenance is required.
- ◆ Pass a 25 question certification examination with a score of 72% or better

Grading, Erosion, and Stormwater Quality Control

Most land disturbing activities in Colorado Springs require that grading, erosion and stormwater quality control plans be developed and submitted to the City. The following information summarizes the requirements for grading, erosion and stormwater quality control plans and the submittal and review process. Also included is a description of the process for addressing non-compliance. It does not contain all applicable requirements. Please see "contact information" on how to obtain more information pertinent to a particular site or situation.

Review Process

Grading, erosion, and stormwater quality control plans are reviewed by City Staff to ensure that City Code and DCMV2 requirements are met. Non-Hillside grading, erosion, and stormwater quality control plans are reviewed/signed off by City Engineering Subdivision Review and Development Review. Individual Hillside Site/Lot Plans are reviewed/signed off by Development Review Staff.

Complaint Process

If deficiencies with grading and/or erosion and stormwater quality control are noticed in the field or reported by citizens, City Engineering inspectors notify the contractor/owner to fix the BMPs. Compliance with the Plan is the responsibility of the developer/owner who signs the Plan.

Situations that present an immediate danger to public and/or private safety and other non-compliance issues may result in enforcement action, per City Code.

Requirements for Grading, Erosion and Stormwater Quality Control Plans

Grading, erosion and stormwater quality control plans are required for all but minor land disturbing activities in accordance with City Code 7.7.15 (Grading, Erosion and Stormwater Quality Control Ordinance) and 7.3.504 (Hillside Ordinance) and the City of Colorado Springs Drainage Criteria Manual, Vol. 2, Chapter 3. Grading, erosion, and stormwater quality control plans are required for the following:

- ◆ Any grading or construction within Hillside Areas (City Code, 7.3.504) or
- ◆ Excavation or fill = 500 CY, or
- ◆ Grading of a site with a land disturbance = 1 acre or
- ◆ Grading on any property with a natural slope > 8% or
- ◆ Any combination of the above three

Grading, erosion, and stormwater quality control plans must be reviewed and filed (signed) by the City when required as noted above and BMPs installed prior to any land disturbance.

NOTE: The City requires the project's Erosion Control Inspector to be a registered PE in Colorado or certified in a City approved erosion control inspection program.
