Camp Creek Drainage Improvement Project  
Community Meeting, October 22, 2013

Small Group Instructions

Task #1

Please review and discuss in your small group the issues on the preliminary issues list. Make sure to allow everyone in your group to offer perspectives about the issues. If you have a question about any of the issues, please raise a hand and someone from the Project Team will come over to assist.

Task #2

Discuss as a group if you believe there are any issues listed that should not be. Write down those issues on your yellow Group Response Form.

Task #3

Does your group believe there are any issues that are missing that should be added to the issues list? If so, please list them on your Group Response Form.

Task #4

Please list the criteria your group suggests be used to evaluate alternative Camp Creek drainage improvement solutions.

Task #5

Once all groups are finished, we will ask as many groups as possible to report out their responses, depending on time constraints. Please select a person in your group to share your group's work with the larger group.
