

Construction Update 2/27/19

MILESTONE JUST MET - Wildcat Construction has successfully completed the installation of the sanitary sewer drainage system as well as the non-potable waterline, this replaces utilities that were 60-100 years old. The reconstruction will improve safety and travel by creating a smooth road surface and replacing water, gas and sewer lines. Both have been completed ahead of schedule.

There is more work that still needs to be done on the Pikes Peak Reconstruction Project, however over 75% is now complete. Even with Colorado's unpredictable weather, Wildcat Construction has managed to stay on schedule.

For more information, contact the project hotline at 719-593-9239 or email at PikesPeakAvene@gmail.com. Information and traffic impacts are also available on the project website at coloradosprings.gov/PikesPeakReconstruct.
