If the Offeror fails to meet any stated insurance requirement provided in this RFP, the Offeror will be rated “fail” in the Insurance Area. 3.3 SELECTION COMMITTEE

A selection committee will review all proposals. Through this process, the City will determine which proposals are acceptable or unacceptable. The City will notify, in

writing, the Offerors whose proposals are deemed to be unacceptable. Those Offerors offering proposals deemed to be acceptable by the City will be evaluated and scored by the selection committee. This scoring will determine which Offerors are considered to be in the competitive range and may be the basis for an award decision without further steps.

If the selection committee elects not to award based upon evaluation scoring, it may engage in a forced elimination process. To inform this process, it may require oral presentations or interviews with the Offerors considered to be in the competitive range. If oral presentations or interviews are conducted, they may also be scored, or they may simply be considered as information supporting the forced elimination process. The selection committee may request revisions to the proposal from each of the Offerors at the conclusion of the interviews. The intent of the forced elimination process is to reach consensus. The decision will be based on all relevant factors, and based upon perception of best value. The final decision may or may not exactly reflect scoring ranking.

The City also reserves the right to request best and final offers from all Offerors at any point in the proposal evaluation process.

3.4 AWARD OF CONTRACT

It is anticipated that there will be negotiations or discussions with Offerors. However, the City reserves the right to award without negotiations or discussions. The City also reserves the right to award a contract not necessarily or merely to the Offeror with the most advantageous price. The City intends to award to the Offeror that demonstrates the best value to the City and the most substantiated ability to fulfill the requirements contained in this Request for Proposal. A contract prepared by the City will be finalized and/or negotiated with the successful Offeror. In the event a contract cannot be negotiated with the top ranked Offeror, the City may enter into negotiations with the second highest ranked Offeror, or the City may decide to call for new proposals. Immediately after the notice of award, the successful Offeror will begin planning in conjunction with the City of Colorado Springs staff (to be designated by the City) to ensure fulfillment of all its obligations. The successful Offeror may be expected to attend regular meetings as required by the City to assist in the preparation for startup.

Within 10 days of execution of this Contract, City shall have the right to object in writing to employment on the Project of any such key person, consultant or assignment of principal responsibility, in which case Contractor will employ alternate personnel for such function or reassign such responsibility to another to whom City has no reasonable objection. Thereafter, Contractor shall not assign or reassign Project work to any person to whom City has reasonable objection.

- a) The key personnel listed in Appendix ____ - "Identification of Personnel, Subcontractors and Task Responsibility" will be the individuals used in the performance of the work unless objected to by the City as provided in the immediately preceding paragraph. 14. Before undertaking any work which Contractor considers beyond or in addition to the scope of work and services which Contractor has contractually agreed to perform under the terms of this Contract, Contractor shall advise City in writing (i) that Contractor considers the work beyond the scope of this Contract, (ii) the reasons the Contractor believes the out of scope or additional work should be performed, and (iii) a reasonable estimate of the cost of such work. 15. Design within Funding Limitation: The Contractor shall accomplish the design services required under this Contract so as to permit the award of a construction contract at a price that does not exceed the estimated construction contract price plus ten percent (10%) as set forth below.
- a) When lowest responsive and responsible bids or proposals for the construction contract are received that exceed the estimated price, the Contractor shall perform such redesign and other services as are necessary to permit contract award within the funding limitation. These additional services shall be performed at no increase in the price of this Contract. However, the Contractor shall not be required to perform such additional services without additional compensation if the unfavorable bids or proposals are the result of conditions beyond its reasonable control i.e. City directed scope changes, unknown design problems are encountered, or a volatile construction market at the time of bid as compared to the construction market at the date this Contract is executed.
 - b) The Contractor must promptly advise the Project Manager if it finds that the Project being designed will exceed or is likely to exceed the funding limitations and it is unable to design the Project within the funding limitation.

c) The estimated construction contract price for the Project described in this Contract is XXXXXXXXXX (plus 10%).

16. The City's review, approval of, acceptance of, or payment for the services required under this Contract shall not be construed to operate as a waiver of any rights under this Contract or of any cause of action arising out of the performance of this Contract, and the Contractor shall be and remain liable to the City for any and all damages to the City caused by the Contractor's negligent performance of any of the services furnished under this Contract.
17. The rights and remedies of the City provided for under this Contract are in addition to any other rights and remedies provided by law.
18. If the Contractor is comprised of more than one legal entity, each such entity shall be jointly and severally liable hereunder.
19. The Contractor shall be obligated to provide services as an expert witness in connection with any public hearings or legal "proceedings" for a period of five (5) years following the completion of the Project. The Contractor shall be reimbursed for such service unless the basic issue of such hearing or "proceeding" concerns sufficiency of the Contractor services as outlined in this Contract. The Contractor hereby agrees to relieve the City from all claims and liability due to the Contractor's negligence.
20. The design of architectural, structural, mechanical, electrical, civil, or other engineering features of the work to be performed under this Contract shall be accomplished or reviewed and approved by architects or engineers registered in the state of Colorado to practice in the professional field involved.

When defects in work or services cannot be corrected by re-performance, the City may (1) require the Contractor to take necessary action to ensure that future performance conforms to Contract requirements and (2) reduce the Contract price to reflect the reduced value of the work or services performed.
3. If the Contractor fails to promptly perform the defective work or services again or to take the necessary action to ensure future performance is in conformity with Contract requirements, the City may (1) by Contract or otherwise, perform the services and charge to the Contractor any cost incurred by the City that is directly related to the performance of such work or service or (2) terminate the Contract for breach of contract.

The Contractor shall obtain the City's Project Manager's written consent before making any substitution of these subcontractors, associates, or other contractors.
2. The Contractor shall include a flow down clause in all of its subcontracts, agreements with outside associates, and agreements with other contractors. The flow down clause shall cause all of the terms and conditions of this Contract, including all of the applicable parts of the Contract Documents, to be incorporated into all subcontracts, agreements with outside associates, and agreements with other contractors. The flow down clause shall provide clearly that there is no privity of contract between the City and the Contractor's subcontractors, outside associates, and other contractors.

8. KEY PERSONNEL

The key personnel listed in the proposal and/or below will be the individuals used in the performance of the work. If any of the listed key personnel leave employment or are otherwise not utilized in the performance of the work, approval to substitute must be obtained by the Contractor from the City's Project Manager. EXHIBIT 5 – STATEMENT OF WORK FOR DESIGN SERVICES FOR THE UPRR MAINLINE OVER FONTANERO BRIDGE REPLACEMENT PROJECT

1. PROJECT GENERAL DESCRIPTION

The City of Colorado Springs is seeking a qualified consultant to provide Professional Design Services for the UPRR Mainline over Fontanero Bridge Replacement Project. The Project is a voter-approved, PPRTA II, A-listed Project. Supplementary documents are included with this Request for Proposals, as Attachments 1 – 7. These documents are subject to change:

1. 2007-2008 SEH Bridge Inspection
2. 2009-2010 SEH Bridge Inspection
3. 2012-2013 Stantec Bridge Inspection
4. 2014 Stantec Bridge Inspection
5. 2016 Benesch Bridge Inspection
6. 2018 HDR Bridge Inspection
7. References

2. PROJECT BACKGROUND INFORMATION

UPRR Mainline over Fontanero Bridge (Structure CSG-G.06-10.49R) was built in 1963. There is a companion structure (Structure CSG-G.07-10.49R) for a sidetrack of the railroad immediately to the east. In March of 2011 the Union Pacific Railroad expressed concerns about the condition of the structure (large cracks have opened up on the underside of the Mainline Bridge). The City hired a consultant to perform a structural assessment of both Bridges. The result of that analysis was that the original Bridge design was not strong enough to meet the Union Pacific Railroad loading requirements (required E72 / existing condition E39). The solution was to temporarily shore both structures until replacement funding is available. PPRTA funded this temporary work in 2012 installing additional concrete piers in Spans 1 and 4 (Concrete caps doweled into superstructure supported by concrete caissons). Replacement is required since this is a critical railroad corridor.

The existing structure is a 130' 7" four-span, continuous, variable depth, cast-in-place, reinforced concrete girder bridge structure carrying the railroad over the roadway. The existing structure was not rated in the latest bridge inspection report. The bridge report also states the following:

14 FT 6 IN Clearance sign on rail post at west side over span 2 (eastbound lanes). 14 FT 6 IN Clearance sign on right shoulder of westbound lanes, 200 ft. east of bridge. See sketch for location and size of utility. Concrete piers have been installed in Spans 1 and 4. Concrete caps doweled into superstructure supported by concrete caissons. Crack displacement is visible with up to 1/4 inch of deflection in all spans under live coal train load. No trains passed during 2018 inspection.

Assumed 1/4 inch wide cracks extend through entire section of slab. Heavy leakage over Pier 2 at east end. 1/4 inch wide cracks with rust stains 8 feet from pier in Spans 1, 3 and 4. Also 1/4 inch crack 12 feet from abutment in Span 4. Numerous hairline to 1/32 inch wide vertical cracks in deck edges, spaced 2-3 feet apart in Spans 3 and 4, and for entire length of both overhangs. Numerous cracks extend transversely into bottom slab. Numerous cracks have efflorescence and rust stains. Several transverse hairline cracks throughout bottom slab at various locations. Span 1 and 4 have full width transverse hairline cracks in soffit spaced approximately 1 apart from abutments to temporary piers. Span 2 has 5 cracks total in the overhang. 15 inch by 4 inch wide by 3 inch deep spa/l with exposed rebar at bottom corner of pier 4. 6 inch diameter spa/l with exposed rebar on bottom of south face. Light hairline cracks at pier walls.

The existing mainline railroad carries a significant number of trains per day across the bridge. The I-25/Fontanero Street Interchange is immediately west of the railroad bridge. Fontanero Street below the bridge has two lanes each direction with no guardrail adjacent to the bridge piers and no sidewalk.

3. GENERAL DESCRIPTION AND SCOPE

General design elements of the project include: Removal and replacement of the existing structure accommodating new curb and gutter, bridge railing, guard railing, surface drainage, appropriate traffic lanes, and pedestrian improvements on both sides underneath the structure. Fontanero Street is currently classified as a minor arterial street at this location and dead ends on the east at the Fontanero Service Center. It is anticipated that the typical section for Fontanero Street will be developed to be consistent with the PPRTA funded project extending Centennial Boulevard into Fontanero Street west of the interchange. There are future plans for expansion of the roadway to the east. The exact width of the proposed roadway has not been determined but will be evaluated during the design.

The project will be divided into two separate phases: Initial Investigation and Recommendation, and Design of Replacements. The initial contract scope will only include the Phase 1 Initial Investigation and Recommendation services. The Phase 2 will be final design of the preferred alternatives.

- A. Phase 1: Initial Investigation and Recommendation. At the initial study level, the City would like to include in the evaluation the adjacent bridge for the railroad sidetrack along with the mainline railroad bridge. The work performed in Phase 1 shall include but not be limited to the following:
 - a) Review of previous recommendations and repair work
 - b) Hands on inspection and evaluation of existing structures
 - c) Railroad track survey
 - d) Development of structural alternatives
 - e) Lifecycle cost analysis of alternatives

- f) Development of cost estimates
- g) Development of potential funding alternatives
- h) Development of preliminary construction phasing plans
- i) Preliminary traffic, transit and multi-modal analysis
- j) Preliminary drainage design
- k) Preliminary geotechnical investigations
- l) Preliminary analysis of environmental issues
- m) Preliminary railroad coordination, including the PUC
- n) Preliminary utility coordination

The selected Consultant is to review, evaluate, and utilize to the maximum extent possible, any drainage reports, survey, traffic, air quality, and geotechnical reports that are available and on file in the City Engineer's Office. At the conclusion of this phase, a decision will be made on the structure type and if both railroad bridges will be done at the same time or at separate times. The City will determine the extent of the work to be released for final design

- B. Phase 2: Design of Replacements. To accomplish the objectives of this project, the scope of design must, as a minimum, include the following:
- a) Coordination with Union Pacific Railroad and Public Utilities Commission
 - b) Topographic mapping, ownership research and right-of-way (ROW) delineation.
 - c) Traffic planning to evaluate the immediate and future number of lanes needed.
 - d) Roadway, drainage, lighting, signing, and striping design.
 - e) Geotechnical engineering and foundation design.
 - f) Drainage planning to evaluate drainage on Fontanero Street.
 - g) Coordination and accommodation of existing and proposed utility improvements.
 - h) Bridge analysis and design.
 - i) Construction phasing for railroad and roadway traffic.
 - j) Construction cost estimating.
 - k) Construction management or support.
 - l) Environmental services.
 - m) Utility coordination.
 - n) Agency & stakeholder coordination.
 - o) Permitting support
 - p) Constructability analysis

At the end of this phase of the project, project bid documents will be completed and the consultant will provide bid period assistance. The consultant will identify all agreements and permits needed for the project and will assist in obtaining them or include them in the bid documents, if the contractor is required to obtain them.

- C. Phase 3: Construction Period Services - Upon review and approval of the

final construction documents by the City and the acquisition of additional property (if necessary), the Consultant shall assist the City in bidding activities. Work may also include providing construction management and inspection during construction. Coordination with the Union Pacific Railroad will be an important part of the construction period and all personnel on the project will go through the required railroad safety training.
