<b>Band</b>	<b>PAR</b>	<b>Probationary Period</b>	<b>12 Months</b>
<b>Zone</b>	<b>6</b>	<b>Job Code</b>	<b>15024</b>

**Class Specification –Radio Technician, Sr**

**Summary Statement:**

The purpose of this position is to provide service, program, maintenance, repair, and installation for 2-way radio, paging, and other specialized communications systems and equipment; to coordinate assigned activities with other programs, divisions, outside agencies, and the general public; and to provide highly responsible and complex staff assistance to higher level supervisory or management staff. This individual will work collaboratively with other team members to ensure customer radios, pagers, communications systems, peripherals, and core services are available and operational to ensure a quality customer experience at all times.

**DISTINGUISHING CHARACTERISTICS:** This is the advanced journey level class in the Radio Technician series. Positions at this level possess a specialized, technical, or functional expertise within the area of assignment and may exercise lead supervision over assigned lower level staff. Employees are typically assigned significant responsibilities above the journey level and often exercise independent judgment in the performance of all duties. This class is distinguished from the Radio Technician II in that it performs the most complex work assigned to series and serves in a working supervisory capacity over lower level staff.
