

Small Group Instructions

Task #1

Start by discussing among your group members the idea of paving Gold Camp Road and talk about the advantages and disadvantages you see. Agree to a list of each and write those on the white 11" x 17" response form titled "Management Toolbox".

Task #2

Then discuss the three options for re-designing the Park entrance and South Cañon (options 8.1, 8.2, and 8.3). Decide on the advantages and disadvantages your group sees to each of those options and write them on the reverse side of the "Management Toolbox" response form.

Task #3

Next, please discuss each of the four Park Use and Circulation alternatives (A,B,C,D).

Then decide on a group rating for each of those alternatives. A "0" rating indicates **NO** group support for that alternatives and a "10" indicates **FULL** support. You can pick any number from "0" to "10."

Remember to circle only ONE number to rate each alternative. Put your ratings on the yellow group response form in the middle of your table.

Be sure to list the reasons for your rating of each alternative so that we can understand your group's thinking behind your numerical rating.

Try hard to spend your time considering all the alternatives equally.

Task #4

Please choose someone to report out your work once all groups have finished.
