Consequently, Contractor represents that Contractor has selected and intends to employ or assign the key personnel and consultants identified in Appendix _____ - "Identification of Personnel, Subcontractors and Task Responsibility", attached hereto for the Project assignments and areas of responsibility stated therein. Within 10 days of execution of this Contract, City shall have the right to object in writing to employment on the Project of any such key person, consultant or assignment of principal responsibility, in which case Contractor will employ alternate personnel for such function or reassign such responsibility to another to whom City has no reasonable objection. Thereafter, Contractor shall not assign or reassign Project work to any person to whom City has reasonable objection.

The key personnel listed in Appendix _____ - "Identification of Personnel, Subcontractors and Task Responsibility" will be the individuals used in the performance of the work unless objected to by the City as provided in the immediately preceding paragraph. If any of the listed key personnel leave employment or are otherwise not utilized in the performance of the work, approval to substitute must be obtained by the Contractor from the City’s delegated Project Manager. provided however, the Contractor will not be responsible for delays beyond its control.

N. Before undertaking any work which Contractor considers beyond or in addition to the scope of work and services which Contractor has contractually agreed to perform under the terms of this Contract, Contractor shall advise City in writing (i) that Contractor considers the work beyond the scope of this Contract, (ii) the reasons the Contractor believes the out of scope or additional work should be performed, and (iii) a reasonable estimate of the cost of such work. O. Design within Funding Limitation: The Contractor shall accomplish the design services required under this Contract so as to permit the award of a construction contract at a price that does not exceed the estimated construction contract price plus ten percent (10%) as set forth below.

1. When lowest responsive and responsible bids or proposals for the construction contract are received that exceed the estimated price, the Contractor shall perform such redesign and other services as are necessary to permit contract award within the funding limitation. These additional services shall be performed at no increase in the price of this Contract. However, the Contractor shall not be required to perform such additional services without additional compensation if the unfavorable bids or proposals are the result of conditions beyond its reasonable control i.e. City directed scope changes, unknown design problems are encountered, or a volatile construction market at the time of bid as compared to the construction market at the date this Contract is executed.

2. The Contractor must promptly advise the Project Manager if it finds that the Project being designed will exceed or is likely to exceed the funding limitations and it is unable to design the Project within the funding limitation.

3. The estimated construction contract price for the Project described in this Contract is $XXXXXXXX (plus 10%).

P. The City's review, approval of, acceptance of, or payment for the services required under this Contract shall not be construed to operate as a waiver of any rights under this Contract or of any cause of action arising out of the performance of this Contract, and the Contractor shall be and remain liable to the City for any and all damages to the City caused by the Contractor's negligent performance of any of the services furnished under this Contract.
Q. The rights and remedies of the City provided for under this Contract are in addition to any other rights and remedies provided by law.

R. If the Contractor is comprised of more than one legal entity, each such entity shall be jointly and severally liable hereunder.

S. The Contractor shall be obligated to provide services as an expert witness in connection with any public hearings or legal "proceedings" for a period of five (5) years following the completion of the Project. The Contractor shall be reimbursed for such service unless the basic issue of such hearing or "proceeding" concerns sufficiency of the Contractor services as outlined in this Contract. The Contractor hereby agrees to relieve the City from all claims and liability due to the Contractor's negligence.

T. The design of architectural, structural, mechanical, electrical, civil, or other engineering features of the work to be performed under this Contract shall be accomplished or reviewed and approved by architects or engineers registered in the state of Colorado to practice in the professional field involved.

A. The extent and character of the work to be done by the Contractor shall be subject to the general approval of the City’s delegated Project Manager.

B. If any of the work or services being performed does not conform with Contract requirements, the City may require the Contractor to perform the work or services again in conformity with Contract requirements, at no increase in Contract amount. When defects in work or services cannot be corrected by re-performance, the City may (1) require the Contractor to take necessary action to ensure that future performance conforms to Contract requirements and (2) reduce the Contract price to reflect the reduced value of the work or services performed.

C. If the Contractor fails to promptly perform the defective work or services again or to take the necessary action to ensure future performance is in conformity with Contract requirements, the City may (1) by Contract or otherwise, perform the services and charge to the Contractor any cost incurred by the City that is directly related to the performance of such work or service or (2) terminate the Contract for breach of contract.

7. SUBCONTRACTORS, ASSOCIATES, AND OTHER CONTRACTORS

A. Any subcontractor, outside associates, or other contractors used by the Contractor in connection with Contractor's work under this Contract shall be limited to individuals or firms that are specifically identified by the Contractor in the Contractor's proposal and agreed to by the City. The Contractor shall obtain
the City’s Project Manager’s written consent before making any substitution of these subcontractors, associates, or other contractors.

B. The Contractor shall include a flow down clause in all of its subcontracts, agreements with outside associates, and agreements with other contractors. The flow down clause shall cause all of the terms and conditions of this Contract, including all of the applicable parts of the Contract Documents, to be incorporated into all subcontracts, agreements with outside associates, and agreements with other contractors. The flow down clause shall provide clearly that there is no privity of contract between the City and the Contractor’s subcontractors, outside associates, and other contractors.

8. KEY PERSONNEL

The key personnel listed in the proposal and/or below will be the individuals used in the performance of the work. If any of the listed key personnel leave employment or are otherwise not utilized in the performance of the work, approval to substitute must be obtained by the Contractor from the City’s Project Manager. Any substitute shall have the same or a higher standard of qualifications that the key personnel possessed at the time of Contract award.

9. START AND CONTINUANCE OF WORK

It is further agreed that the Contractor will start work promptly and continue to work diligently until this Contract is completed.

The following provisions shall apply to this Contract and shall take precedence and control in the event of conflict with any other provisions of the Contract:

EXHIBIT 5 STATEMENT OF WORK FOR PLATTE AVENUE OVER SAND CREEK BRIDGE REPLACEMENTS

The City of Colorado Springs is requesting proposals for complete design services for the replacement of the eastbound and westbound Platte Avenue Bridges over Sand Creek. The anticipated construction limits for this project will be from Powers Boulevard to Babcock Road. Project Deliverables will need to consider functionality and aesthetics for this east entrance into Colorado Springs that serves as a gateway. The ultimate design will further develop new roadway geometry for Platte Avenue, Babcock Road, Troy Hill Road and Space Center Drive.

“Phase 1: Preliminary Design”

Engineering Design Services will be needed to develop preliminary plans for this project. The goals for Preliminary Design deliverables will be:

1. Identify design phasing, design costs, construction costs and construction phasing.
2. Develop and evaluate roadway, drainage and bridge geometry alternatives.
3. Identify a preferred alternative that will replace the bridges while improve the roadway cross section, drainage improvements, traffic flow, and non-motorized mobility.
4. Develop a preliminary Environmental Assessment that can progress into NEPA requirements for a fully federalized project.
5. Safety improvements.
6. Public involvement process and outreach.
7. Establish ultimate Right-of-Way, easement needs for the project.
8. Preliminary Utility Investigation and development of preliminary design solutions.

“Phase 2: Final Design”

Phase 2: Final Design consists of addressing environmental issues, if any, and bringing plans to final completion and a “construction ready” status.

PROJECT BACKGROUND INFORMATION:

This project will be funded by combining Local and Federal funds. Pikes Peak Rural Transportation Authority (PPRTA) “A List” Project which was intended to replace the west bound bridge and STP METRO funds intended to replace the east bound bridge, this will federalize both bridges.

This replacement is driven by the condition of the existing bridge decks. In addition to this goal, the project will need to consider and plan for the future capacity improvements on the Platte Avenue Corridor.
Since Platte Avenue is one of the City East/West Mobility Corridors, the City has been working and planning improvements throughout the corridor. Some of these improvements are already under construction and funding for others is still being pursued. Currently the PPRTA contains three different projects concerning Platte Avenue. The first project will be this project so that both of the Platte Avenue Bridges over Sand Creek can be replaced at once. The combination of the Federal funding for this project, $7,812,379, with a City match of $349,563 and PPRTA funding of $5,874,000 will be combined for a total of $14,035,942. This will create a more cost effective investment to replace these bridges. The second project is a planning study that will focus on the challenges of connecting Platte Avenue to I-25 which was detailed in the East/West Mobility Study. The third project is a planning study that will focus on the challenges from Chelton Road to Wahsatch Avenue, the east entrance of downtown Colorado Springs.

The City developed, with the assistance of a consulting engineer, the Platte Avenue over Sand Creek Conceptual Design Report in 2003. This report is very comprehensive and clearly establishes the project goals, alternatives, challenges and defines the project area. This document is a two volume report with approximately 300 pages of information (see attached pdf’s). Included in this effort, the report contains a traffic analysis, evaluation of the channel and structure size requirements, and a preliminary geotechnical evaluation. This provides a strong basis and head start for this project, but needs to be re-evaluated.

Due to the efforts in the Conceptual Design Report, the City believes that the bridge replacement project has independent utility and can move forward regardless of future capacity improvements to the corridor. However, it is recognized that there will need to be coordination and consideration of this effort. It is possible that the bridges constructed by this project may have to be constructed in a way that would enable them to be widened in the future. However, the City believes there are more effective ways to manage this issue and considers this a worst case scenario. The existing condition of the bridges is necessitating the City to move forward with the replacement project as quickly as possible.

The two most significant challenges to replacing the bridge are Sand Creek, construction phasing and managing the roadway approach improvements. The concept report indicates more approach work than normal. This is because the potential for raising the bridges when they are replaced is high. This is likely to require the reconstruction of at least portions of two intersections near the bridges. The Sand Creek challenges focus on how to manage the bridge configuration for a waterway with such volatile erosion characteristics. The City has already invested in stabilizing this portion of Sand Creek and is planning construction of additional channel stabilization measures downstream using FEMA funding which will have a separate RFP process (both selected consultants will be expected to share engineering work for the success and efficacies for the projects).

**REQUIRED WORK:**
The overall purpose of this RFP is to select a consulting team (Consultant) that is qualified and able to provide the services outlined in this document. The Consultant shall structure their proposal by detailing a phased approach. The Consultant should clearly identify the appropriate level of effort/study proposed for preliminary design, as well as identifying which portions of the task could be deferred to a later phase.

The selected consultant will have responsibility to manage the schedule, budget, and progress reporting for all phases of work needed for the successful completion of the project, and will have responsibility to perform all tasks associated with the work in accordance with City and CDOT standards including but not limited to: topographic and property surveying; roadway design; research of records including ownership, public involvement and informational meetings; environmental coordination and permitting; utility coordination and relocation; coordination with adjacent development proposals; roadway profile and horizontal design; Right of Way and construction easement description and acquisition; geotechnical engineering; hydrologic and hydraulic design; floodplain; water quality; pavement design; pavement drainage design; roadway lighting design; traffic engineering; pavement marking and signing design; work zone traffic control design and construction phasing plan; erosion control and storm water protection plan design; urban design and landscaping; bridge design; structural elements; completion of final plans, specifications and construction cost estimate; bidding; required engineering design support services during construction, and design management support.

The Contractor will take such action with respect to any subcontract or purchase order as the administering agency may direct as a means of enforcing such provisions, including sanctions for noncompliance. *Provided, however,* that in the event the Contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the administering agency the Contractor may request the United States to enter into such litigation to protect the interests of the United States.

(10) **Incorporation by operation of the order.** By operation of the order, the equal opportunity clause shall be considered to be a part of every contract and subcontract required by the order and the regulations in this part to include such a clause whether or not it is physically incorporated in such contracts and whether or not the contract between the agency and the contractor is written.

(11) **Adaptation of language.** Such necessary changes in language may be made in the equal opportunity clause as shall be appropriate to identify properly the parties and their undertakings. [43 FR 49240, Oct. 20, 1978, as amended at 62 FR 66971, Dec. 22, 1997]

2. **EQUAL EMPLOYMENT OPPORTUNITY REPORTS AND OTHER REQUIRED INFORMATION**

(a) **Requirements for prime contractors and subcontractors.**

tier which performs construction work at the site of construction shall be required to file such a report if it meets requirements of paragraphs (a)(1) (i), (ii), and (iv) of this section.

(2) Each person required by § 60-1.7(a)(1) to submit reports shall file such a report with the contracting or administering agency within 30 days after the award to him of a contract or subcontract, unless such person has submitted such a report within 12 months preceding the date of the award. Subsequent reports shall be submitted annually in accordance with § 60-1.7(a)(1), or at such other intervals as the Deputy Assistant Secretary may require. The Deputy Assistant Secretary may extend the time for filing any report.

(3) The Deputy Assistant Secretary or the applicant, on their own motions, may require a contractor to keep employment or other records and to furnish, in the form requested, within reasonable limits, such information as the Deputy Assistant Secretary or the applicant deems necessary for the administration of the order.

(4) Failure to file timely, complete and accurate reports as required constitutes noncompliance with the prime contractor’s or subcontractor’s obligations under the equal opportunity clause and is ground for the imposition by the Deputy Assistant Secretary, an applicant, prime contractor or subcontractor, of any sanctions as authorized by the order and the regulations in this part.

(b) Requirements for bidders or prospective contractors—

(1) Certification of compliance with Part 60-2: Affirmative Action Programs. 3. CONSTRUCTION WAGE RATE REQUIREMENTS (DAVIS BACON) (From FAR 52.222-6)

The term “Contracting Officer” herein shall refer to the City of Colorado Springs Contracting Specialist assigned to this contract.

(a) Definition.-“Site of the work”-
   (1) Means-
      (i) The primary site of the work. The physical place or places where the construction called for in the contract will remain when work on it is completed; and
      (ii) The secondary site of the work, if any. Any other site where a significant portion of the building or work is constructed, provided that such site is-
         (A) Located in the United States; and
         (B) Established specifically for the performance of the contract or project;
   (2) Except as provided in paragraph (3) of this definition, includes any fabrication plants, mobile factories, batch plants, borrow pits, job headquarters, tool yards, etc., provided-
      (i) They are dedicated exclusively, or nearly so, to performance of the contract or project; and
      (ii) They are adjacent or virtually adjacent to the “primary site of the work” as defined in paragraph (a)(1)(i), or the “secondary site of the work” as defined in paragraph (a)(1)(ii) of this definition;
   (3) Does not include permanent home offices, branch plant establishments, fabrication plants, or tool yards of a Contractor or subcontractor whose locations and continuance in operation are determined wholly without regard to a particular Federal contract or project. In addition, fabrication plants, batch plants, borrow pits, job headquarters, yards, etc., of a commercial or material supplier which are established by a supplier of materials for the project before opening of bids and not on the Project site, are not included in the “site of the work.” Such permanent, previously established facilities are not a part of the “site of the work” even if the operations for a period of time may be dedicated exclusively or nearly so, to the performance of a contract.

(b) (1) All laborers and mechanics employed or working upon the site of the work will be paid unconditionally and not less often than once a week, and without subsequent deduction or rebate on any account (except such payroll deductions as are permitted by regulations issued by the Secretary of Labor under the Copeland Act (29 CFR part 3)), the full amount of
wages and bona fide fringe benefits (or cash equivalents thereof) due at
time of payment computed at rates not less than those contained in the
wage determination of the Secretary of Labor which is attached hereto
and made part hereof, or as may be incorporated for a secondary site of
the work, regardless of any contractual relationship which may be alleged
to exist between the Contractor and such laborers and mechanics. Any
wage determination incorporated for a secondary site of the work shall be
effective from the first day on which work under the contract was
performed at that site and shall be incorporated without any adjustment in
contract price or estimated cost. Laborers employed by the construction
Contractor or construction subcontractor that are transporting portions of
the building or work between the secondary site of the work and the
primary site of the work shall be paid in accordance with the wage
determination applicable to the primary site of the work.

(2) Contributions made or costs reasonably anticipated for bona fide fringe
benefits under section 1(b)(2) of the Construction Wage Rate
Requirements statute on behalf of laborers or mechanics are considered
wages paid to such laborers or mechanics, subject to the provisions of
paragraph (e) of this clause; also, regular contributions made or costs
incurred for more than a weekly period (but not less often than quarterly)
under plans, funds, or programs which cover the particular weekly period,
are deemed to be constructively made or incurred during such period.

(3) Such laborers and mechanics shall be paid not less than the
appropriate wage rate and fringe benefits in the wage determination for
the classification of work actually performed, without regard to skill, except
as provided in the clause entitled Apprentices and Trainees. Laborers or
mechanics performing work in more than one classification may be
compensated at the rate specified for each classification for the time
actually worked therein; provided that the employer’s payroll records
accurately set forth the time spent in each classification in which work is
performed.

(4) The wage determination (including any additional classifications and
wage rates conformed under paragraph (c) of this clause) and the
Construction Wage Rate Requirements (Davis-Bacon Act) poster (WH-
1321) shall be posted at all times by the Contractor and its subcontractors
at the primary site of the work and the secondary site of the work, if any, in
a prominent and accessible place where it can be easily seen by the
workers.

(c)

(1) The Contracting Officer shall require that any class of laborers or
mechanics which is not listed in the wage determination and which is to be
employed under the contract shall be classified in conformance with the
wage determination. The Contracting Officer shall approve an additional
classification and wage rate and fringe benefits therefor only when all the following criteria have been met:

(i) The work to be performed by the classification requested is not performed by a classification in the wage determination.
(ii) The classification is utilized in the area by the construction industry.
(iii) The proposed wage rate, including any bona fide fringe benefits, bears a reasonable relationship to the wage rates contained in the wage determination.

(2) If the Contractor and the laborers and mechanics to be employed in the classification (if known), or their representatives, and the Contracting Officer agree on the classification and wage rate (including the amount designated for fringe benefits, where appropriate), a report of the action taken shall be sent by the Contracting Officer to the Administrator of the:

Wage and Hour Division
Employment Standards Administration
U.S. Department of Labor
Washington, DC 20210

The Administrator or an authorized representative will approve, modify, or disapprove every additional classification action within 30 days of receipt and so advise the Contracting Officer or will notify the Contracting Officer within the 30-day period that additional time is necessary.

(3) In the event the Contractor, the laborers or mechanics to be employed in the classification, or their representatives, and the Contracting Officer do not agree on the proposed classification and wage rate (including the amount designated for fringe benefits, where appropriate), the Contracting Officer shall refer the questions, including the views of all interested parties and the recommendation of the Contracting Officer, to the Administrator of the Wage and Hour Division for determination. The Administrator, or an authorized representative, will issue a determination within 30 days of receipt and so advise the Contracting Officer or will notify the Contracting Officer within the 30-day period that additional time is necessary.

(4) The wage rate (including fringe benefits, where appropriate) determined pursuant to paragraphs (c)(2) and (c)(3) of this clause shall be paid to all workers performing work in the classification under this contract from the first day on which work is performed in the classification.

(d) Whenever the minimum wage rate prescribed in the contract for a class of laborers or mechanics includes a fringe benefit which is not expressed as an hourly rate, the Contractor shall either pay the benefit as stated in the wage determination or shall pay another bona fide fringe benefit or an hourly cash equivalent thereof.
(e) If the Contractor does not make payments to a trustee or other third person, the Contractor may consider as part of the wages of any laborer or mechanic the amount of any costs reasonably anticipated in providing bona fide fringe benefits under a plan or program; provided, That the Secretary of Labor has found, upon the written request of the Contractor, that the applicable standards of the Construction Wage Rate Requirements statute have been met. The Secretary of Labor may require the Contractor to set aside in a separate account assets for the meeting of obligations under the plan or program.

4. CONTRACT WORK HOURS AND SAFETY STANDARDS (from FAR 52.222-4)

The term “Contracting Officer” herein shall refer to the City of Colorado Springs Contracting Specialist assigned to this contract.

The term “Government” herein shall refer to the City of Colorado Springs and any interested federal or state entity.

(a) Overtime requirements. No Contractor or subcontractor employing laborers or mechanics (see Federal Acquisition Regulation 22.300) shall require or permit them to work over 40 hours in any workweek unless they are paid at least 1 and 1/2 times the basic rate of pay for each hour worked over 40 hours.

(b) Violation; liability for unpaid wages; liquidated damages. The responsible Contractor and subcontractor are liable for unpaid wages if they violate the terms in paragraph (a) of this clause. In addition, the Contractor and subcontractor are liable for liquidated damages payable to the Government. The Contracting Officer will assess liquidated damages at the rate of $10 per affected employee for each calendar day on which the employer required or permitted the employee to work in excess of the standard workweek of 40 hours without paying overtime wages required by the Contract Work Hours and Safety Standards statute (found at 40 U.S.C. chapter 37).

(c) Withholding for unpaid wages and liquidated damages. The Contracting Officer will withhold from payments due under the contract sufficient funds required to satisfy any Contractor or subcontractor liabilities for unpaid wages and liquidated damages. If amounts withheld under the contract are insufficient to satisfy Contractor or subcontractor liabilities, the Contracting Officer will withhold payments from other Federal or federally assisted contracts held by the same Contractor that are subject to the Contract Work Hours and Safety Standards statute

(d) Payrolls and basic records.

(1) The Contractor and its subcontractors shall maintain payrolls and basic payroll records for all laborers and mechanics working on the contract during the contract and shall make them available to the Government until 3 years
after contract completion. The records shall contain the name and address of each employee, social security number, labor classifications, hourly rates of wages paid, daily and weekly number of hours worked, deductions made, and actual wages paid. The records need not duplicate those required for construction work by Department of Labor regulations at 29 CFR 5.5(a)(3) implementing the Construction Wage Rate Requirements statute.  
(2) The Contractor and its subcontractors shall allow authorized representatives of the Contracting Officer or the Department of Labor to inspect, copy, or transcribe records maintained under paragraph (d)(1) of this clause. The Contractor or subcontractor also shall allow authorized representatives of the Contracting Officer or Department of Labor to interview employees in the workplace during working hours.

(e) Subcontracts. The Contractor shall insert the provisions set forth in paragraphs (a) through (d) of this clause in subcontracts that may require or involve the employment of laborers and mechanics and require subcontractors to include these provisions in any such lower tier subcontracts. The Contractor shall be responsible for compliance by any subcontractor or lower-tier subcontractor with the provisions set forth in paragraphs (a) through (d) of this clause.

5. CLEAN AIR ACT
