

URBAN WATER CYCLE TOUR

Details

DATES:

Friday, August 16th 2024 OR
Saturday, August 17th 2024
9am-12pm

Please arrive by 8:45am in order to be ready to ride at 9:00am.

And stick around for a social afterwards!

STARTING LOCATION:

Colorado Springs Sustainacenter
702 East Boulder Street
Colorado Springs, Colorado 80903

GEAR:

Helmets are required and we recommend sunscreen and water.

Join us on either August 16th or 17th for a fun, free waterway bike tour around the Legacy Loop in Colorado Springs!

This tour will connect community members to local water and recreation resources through an approximately 10 mile mostly flat pedaling tour. Most of the tour will be on paved and natural surface trails but there will be a section of rougher, unimproved dirt. We suggest a bike with wider tires.

Both tour days start at the COS Sustainacenter with convenient parking and facilities. The ride will follow the Legacy Loop trail system, starting along Shooks Run with the first planned stop at Concrete Coyote. We will connect to the Pikes Peak Greenway after transiting through the Enchanted Forest and will make our way around the 'Loop', stopping at a number of locations where you'll hear from local content experts. We are planning for an after-ride social gathering with food at the last stop, which is right across the street from the start location.

We thank our partners at the City of Colorado Springs Stormwater Enterprise and Parks, Recreation and Cultural Services, Colorado Springs Utilities, Trails and Open Space Coalition, Fountain Creek Watershed District, and Concrete Couch for making this tour possible. We look forward to a fun and educational day along the Legacy Loop!

Registration

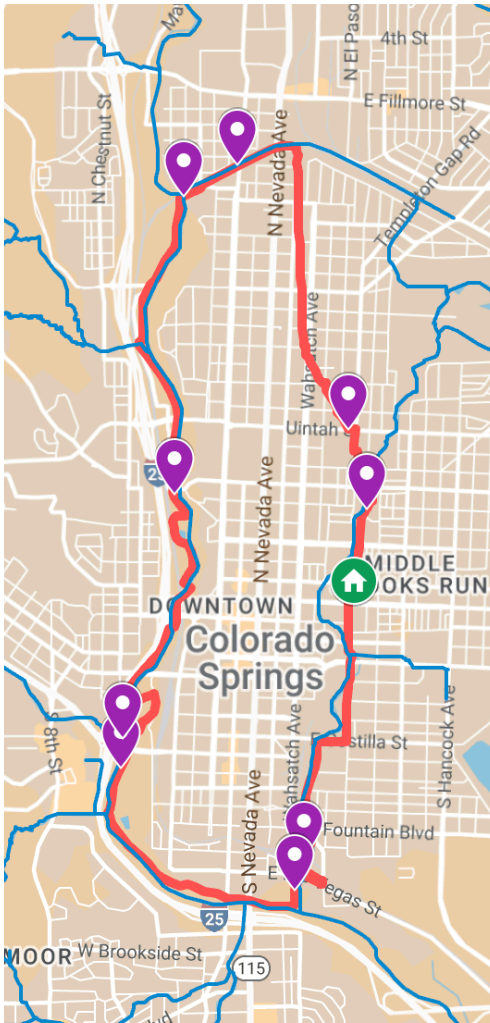

Each day will be limited to 30 riders. Riders must be 18 years old or older. Register in advance to ride.

FRIDAY: <https://bit.ly/3LBJZgR>

SATURDAY: <https://bit.ly/4dddQrT>

Map

Tour topics include:

- What are the Shooks Run, Monument Creek, Fountain Creek, and Arkansas River watersheds?
- What is the water quality of our streams?
- How are utility infrastructure projects impacting our waterways?
- How are community partners connecting neighborhoods to trails and creeks?
- How can you protect stream health and support a sustainable water supply?
